

# Natural Gas STAR Partner Newsletter

October 2005

## Welcome

This is the October 2005 installment of a monthly newsletter highlighting Devon's activities in the Environmental Protection Agency (EPA) Natural Gas STAR Program. These monthly installments summarize Devon's methane emission efforts and a specific partner reported emission reduction opportunity that might be of benefit at certain Devon operations.

## STAR Reductions

Methane Reduction Activity	Methane Reductions (Cumulative)	2005 YTD
Central Division	4,255,127	1,549,741
FWB	3,719,169	1,117,405
Mid-Continent	535,958	432,336
Southern Division	6,088,542	2,297,441
South Texas	2,525,692	446,198
Carthage	2,517,206	1,151,314
Groesbeck	1,045,644	699,928
Western Division	2,937,115	501,270
Rockies	1,143,234	249,555
Permian	1,793,881	251,715
Gulf Division	141,529	12,045
Midstream	1,753,827	263,645
Total Reductions	15,176,140	4,624,143

- Welcome
- Division Status Table
- Annual Reduction Graph
- EPA Award Recognition

### EPA Awards Devon as the Production Sector "Partner of the Year"

On October 25<sup>th</sup>, EPA recognized Devon Energy as the production sector "Partner of the Year" at the annual Natural Gas STAR workshop in Houston. "We are very pleased with the accomplishments of our emission reduction program, and we are honored to receive the EPA's recognition," said Devon President John Richels. "The credit for our success goes to Devon's outstanding field personnel, who are working hard to develop our initiatives and put them into action."

In addition to the company award, Central Division's EHS Supervisor Steve O'Connell won the 2005 Natural Gas STAR "Implementation Manager of the Year" award.

If you have an idea regarding methane emission reduction activities, please contact your EHS specialist or Steve O'Connell at (405) 552-4672.
